DETAILED ACTION

Claims 1-16 are pending after the preliminary amendment of 4/25/05.

Claim Rejections - 35 USC § 102

1. Claims 1-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP-09-302115, OR WO 99/10165.

This JP reference teaches a polyaramid porous membrane packed with a polyelectrolyte from both sides by impregnating with an ion exchange resin (polymer electrolyte).

The WO reference teaches a polyelectrolyte or ion exchange membrane layered on both sides of a support membrane formed from polybenzazole or polyaramid – see page 9.

All the limitations recited in the claims other than the polyaramide layer and the ion exchange resin are directed at the method of making. “[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” In re *Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 63-066233.

This reference also teaches a polyaramid membrane. The rest of the limitations in these claims are directed at the process of making - In re Thorpe.
